

The CCC team is looking forward to engaging with you via our scheduled workshops during 2022! Please keep in mind that we are more than happy to schedule a tailored training session with you to address your specific carbon footprinting or emission reduction needs. Please contact us for a cost estimate.

Please remember that our Light Carbon Footprint workshops are presented at no cost at all, and we encourage you to attend these to learn more about calculating your farm, packhouse, cold store, CA store, winery and distribution carbon footprint.

The Full carbon footprint workshops is presented at a fee as detailed below. In order to receive a competency certificate after the Full Carbon Footprint workshop, you will need to complete a competency exercise that will be explained to you during the workshop.

No preparation is needed for the workshops, but we do encourage you to register well in advance. Dates and other information also available on www.climatefruitandwine.co.za.
